
SAHITHI VELAGA

Arlington, TX 76010 ♦ (469) 653-5291 ♦ sahithivelaga@gmail.com

PROFESSIONAL SUMMARY

Dynamic data engineer with a robust background at Experian, specializing in PySpark and Java. Expertise in optimizing data processing has led to significant performance improvements, demonstrating a proven ability to tackle complex challenges. A strong collaborative spirit drives the commitment to enhancing developer experiences through innovative solutions. Passionate about leveraging cloud technologies and effective data management strategies to deliver impactful results.

SKILLS

- | | |
|---|--|
| • Languages & Libraries: PySpark, Scala, Python (NumPy, Pandas, Seaborn, PyTorch, SciPy, Matplotlib), Java, SQL | • Database : Oracle, MySQL, PostgreSQL, MongoDB |
| • Data Analytics & Web Dev: Node.js, Tableau, Informatica PowerCenter, React, Backstage, Eclipse, Jupyter, Visual Studio | • Cloud & DevOps: AWS (S3 buckets, EMR, EC2 and IAM roles), Azure, Docker, Jenkins, Git, BitBucket, Maven |

EXPERIENCE

Software Engineering Intern, 08/2024 - 11/2025

Experian

- Migrated Python code to PySpark for optimized processing of filters, attributes, and Python UDFs for the India region, resulting in faster execution times and improved resource efficiency.
- Migrated Python-based data processing logic to Java for the Italy bureau and performed comparative performance testing between Python UDFs, PySpark, and Java to determine the most efficient production-ready stack.
- Designed and developed the DevHub portal frontend based on Figma designs, integrating Backstage and Wayfarer components to deliver a modern and intuitive developer experience.
- Optimized AWS EMR clusters for efficient data processing workflows, reducing cluster load and improving scalability, achieving a 40% reduction in cluster resource consumption.
- Collaborated with cross-functional teams using Git and Bitbucket for version control, ensuring smooth integration, continuous delivery, and high-quality code releases across multiple environments.

Assistant System Engineer, 11/2021 - 09/2022

TCS

- Worked with Client (Ecolab) as a developer which is a manufacturing company making different products.
- As a part of development, created a system which will process all the raw data (using ETL, Oracle and IDQ tool) to Talend a golden record and later on downstream teams will use this data for BI reporting.
- Worked with Client (Ecolab) as a developer which is a manufacturing company making different products.

Data Science Intern, 08/2020 - 09/2020

Exposys Data Labs

- Worked as Data Science intern - learning and helping with the Customer segmentation of sum of squared errors (WCSS).
- Developed sum of squared errors (WCSS) using K-Means clustering and elbow method and also visualized some of the attributes like gender and age. Developed WCSS to analyze their annual incomes and computing spending scores.

EDUC

M.S: Computer Science, 05/2024

University of Texas At Arlington - Texas, TX

B.Tech: Computer Science & Engineering, 06/2021

VR Siddhartha Engineering College - India

CERTIFICATIONS

Microsoft Azure AI Fundamentals (AI-900)

PROJECTS

- 'COVID-19 Outbreak Analysis and Prediction in India' project it was published in International Conference named "Innovations in Computers Networks, Computational Intelligence and IOT" [ICICI-21] in journal of the Maharaja Sayajirao University of Baroda ISSN: 00250422 ○ Data gathered from Kaggle, JHU, WHO ○ Analyzing the outbreak analysis using bar graphs, scatter plots, iplots. ○ Leveraged FB prophet model for prediction.
- 'Electronics Sales Data Analysis' project consists of sales data of 2019 taken from Kaggle. Analyzing through bar graphs and plots. Using Python programming, the data is curated and processed to obtain details like the place and period with the highest sales. Therefore, the best sold items are identified in this project.
- 'Web Based Application for Ayurvedic Medication Seekers' was published in IJRAR, Volume 7 Issue 3, in September 2020.

- Cloud Computing & Big Data, Graduate
- Data Mining, Graduate
- Distributed Systems, Graduate
- Machine Learning, Graduate
- Data Analysis & Modeling Techniques, Graduate
- Computer Vision, Graduate
- Design and Analysis of Algorithms, Graduate
- Artificial Intelligence, Graduate
- Artificial Intelligence for Everyone, Coursera
- Linux Unhatched, Cybersecurity essentials - Cisco Networking
